

Add-on Card AOC-SLG3-4X4P

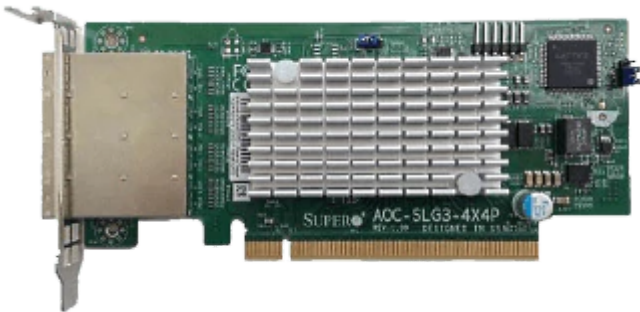

Specifications

Add-on Card

Supermicro JBOF Gen-3 external NVMe Host Bus Adapter

The AOC-SLG3-4X4P is a low-profile, PCI-E x16 buffer expansion card that features an external NVMe connector for high-performance storage connectivity. This HBA card is built around a PCI-E switch IC which is proven NVMe technology with optimum performance for increased bandwidth.

This AOC addresses the growing demand for increased data throughput and scalability requirements across enterprise-class JBOF platforms.

This product is only available through Supermicro.

Compliance

RoHS ■ RoHS Compliant 6/6, Pb Free

Key Features

- PCI-E Gen-3 NVMe controller for JBOF
- Supports 2-Host, 4-Host and 8-Host Modes
- PCI-E Switch
- Supports 55°C
- OS Support: Windows, Linux
- Uses 4 Mini-SAS HD (SFF 8643) connectors

Dimensions

H x L 2.71" x 6.1"
